

Table 5. Laboratory Water Quality Data for Laurel Lake, 2002.

Sampling locations are illustrated in Figure 5.

Sites selected for sampling include in-lake (LL-1) surface (S), middle (M), and bottom (B) stations, the Sargent Brook tributary (LL-2), the unnamed tributary on Laurel Lake Crossroads (LL-3), the outlet (LL-4), and a storm drain at the boat launch (LL-5).

Arithmetic means (averages) are presented for laboratory parameters.

Data preceded by a less than symbol (<) were divided by 2 before mean values (averages) were computed.

N/A: Not applicable, sampling of parameter not required at this location or time per Quality Assurance Project Plan.

No flow: Non-flowing conditions at sampling locations prevented sample collection.

Orange coloration indicates that field parameter exceeds Massachusetts Water Quality Standards (DEP 1998) and/or the Best Professional Judgment (BPJ) of ESS Water Resource Scientists.

Refer to Section 3.2.2 for a more detailed explanation of water quality standards employed for this analysis.

Sample ID	Date	Sample Type (Dry / Wet)	Fecal coliform (Col./100 ml)	Total Alkalinity (mg/L)	Ammonia Nitrogen (mg/L)	Nitrate Nitrogen (mg/L)	Total Kjeldahl Nitrogen (mg/L)	Total Iron (mg/L)	Total Phosphorus (mg/L)	Dissolved Phosphorus (mg/L)
