

## LEE - BRIDGE REPLACEMENT, L-05-004, MEADOW STREET OVER POWDER MILL BROOK

### What is happening?

This project proposes to replace Bridge L-05-004 in the Town of Lee, which carries Meadow Street over Powder Mill Brook (a.k.a. Beartown Brook). The bridge was closed due to its deteriorated condition and a temporary single lane bridge with alternating traffic has been placed over the existing bridge until a new permanent structure is constructed by this project. The project will not significantly change the existing geometry of the roadway and will restore a two-lane vehicle bridge over Powder Mill Brook. The existing bridge span will be lengthened to provide a wider hydraulic opening for Powder Mill Brook, stream scour counter measures and stream bank habitat improvements will be installed upstream of the bridge.

### How will this affect you?

MassDOT anticipates the project to last approximately 12 months to complete construction which includes utility pole relocations, stream restoration, and replacement of the bridge. A full roadway closure will be implemented for approximately 6 months to reconstruct the bridge. Portable changeable message signs and temporary traffic signs will be used to warn roadway users in advance of the bridge closure.

### When

Wednesday, September 6<sup>th</sup>, 2023  
7:00PM

### Attend
